

## Ideas

① Aus Imports/Exp

a) Tree map

b) Map

c) bubble chart

② categories of trade

a) donut chart

b) Area chart

c) bar stacked

③ Tariffs and other info

a) dot strip plot

b) column range

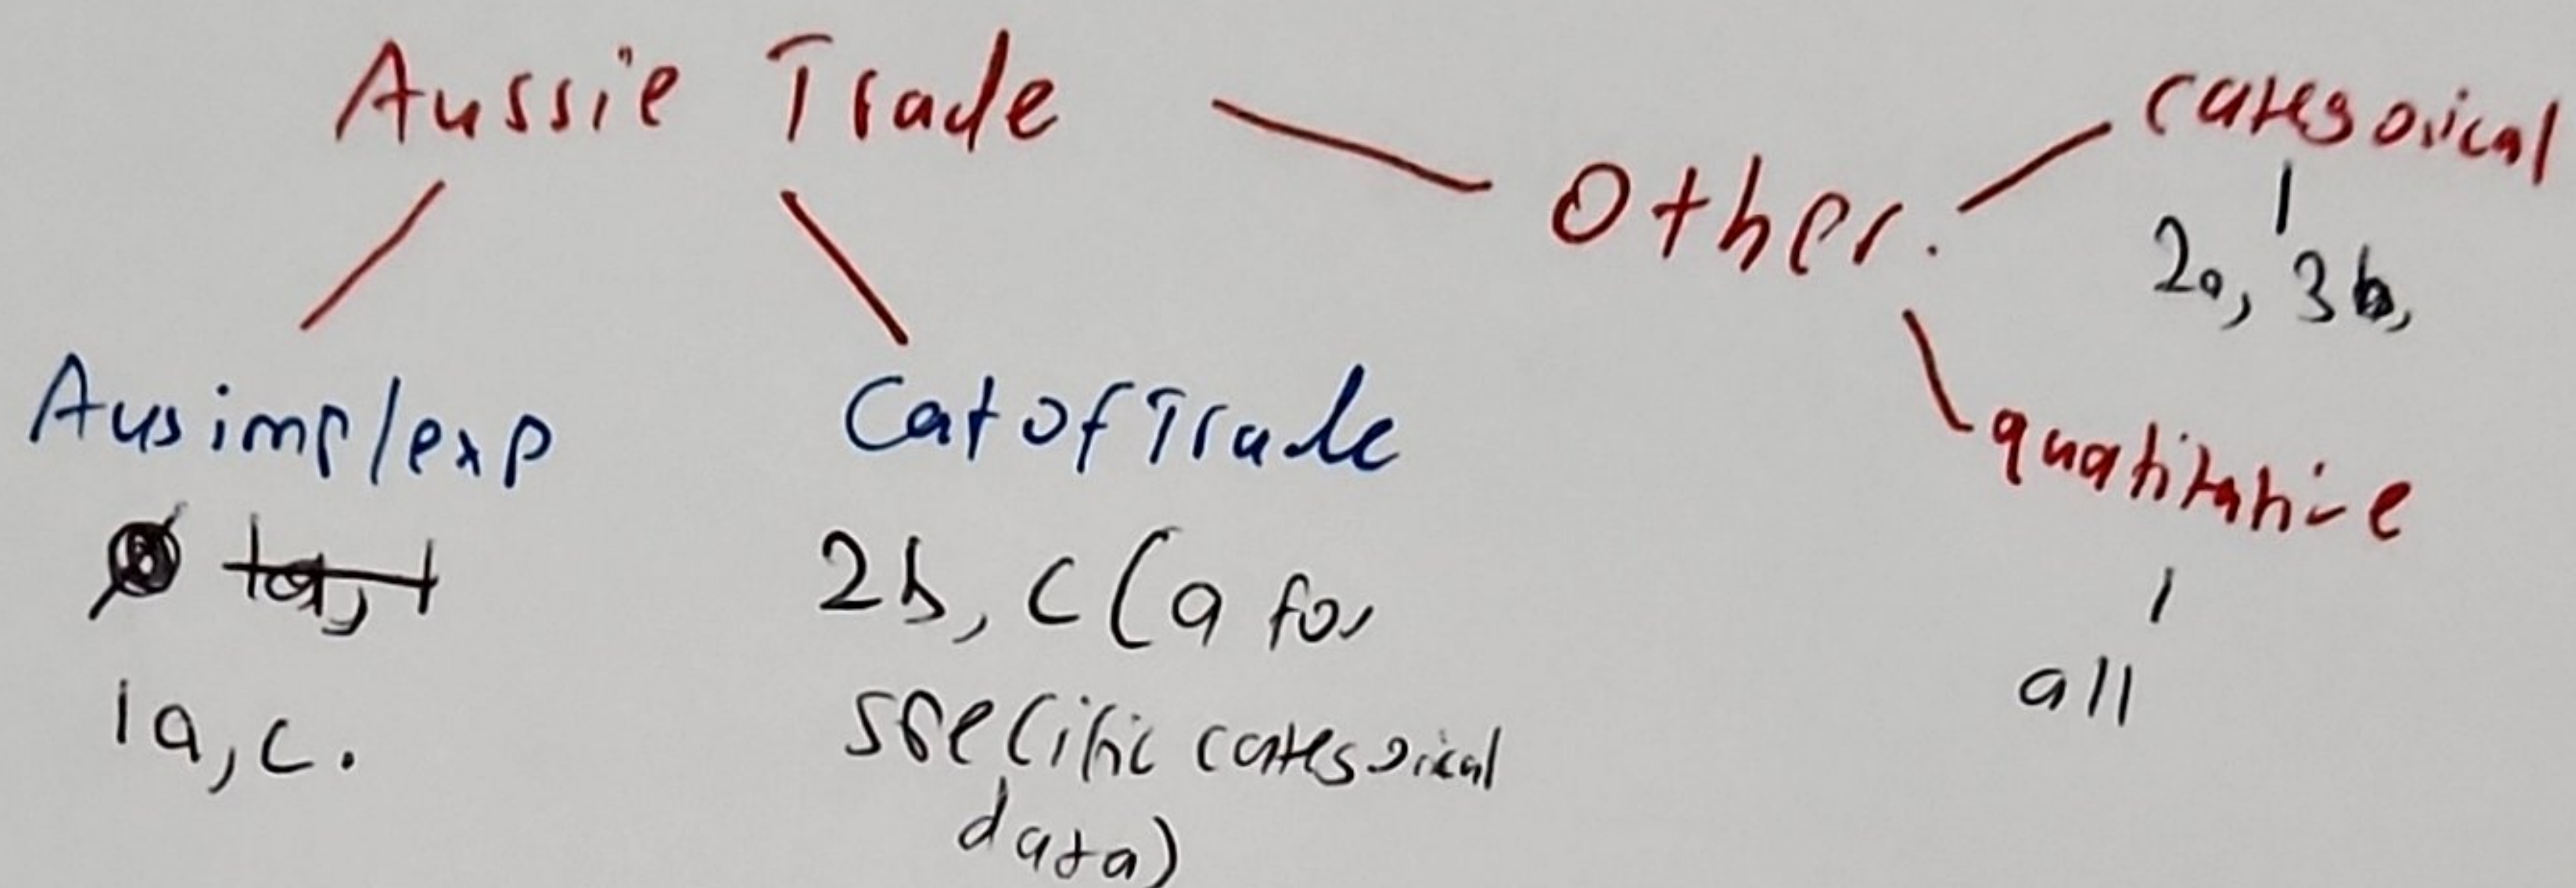

## Filter

3a) doesn't allow for capture of wide info (year, change etc)

1a) Although useful, may not be the best for a worldwide outlook as smaller values get overlooked.

## Categorise

## Combine & Refine

1c and 2a can be combined to have some similar entries (same continent) to be categorised.

3a and b may be combined to

## Summarise and question

• Is it better to show values as absolute or in a percentage form. Would this even be possible given the data?

## Big Picture / Layout

### Aussie Trade

#### Exports

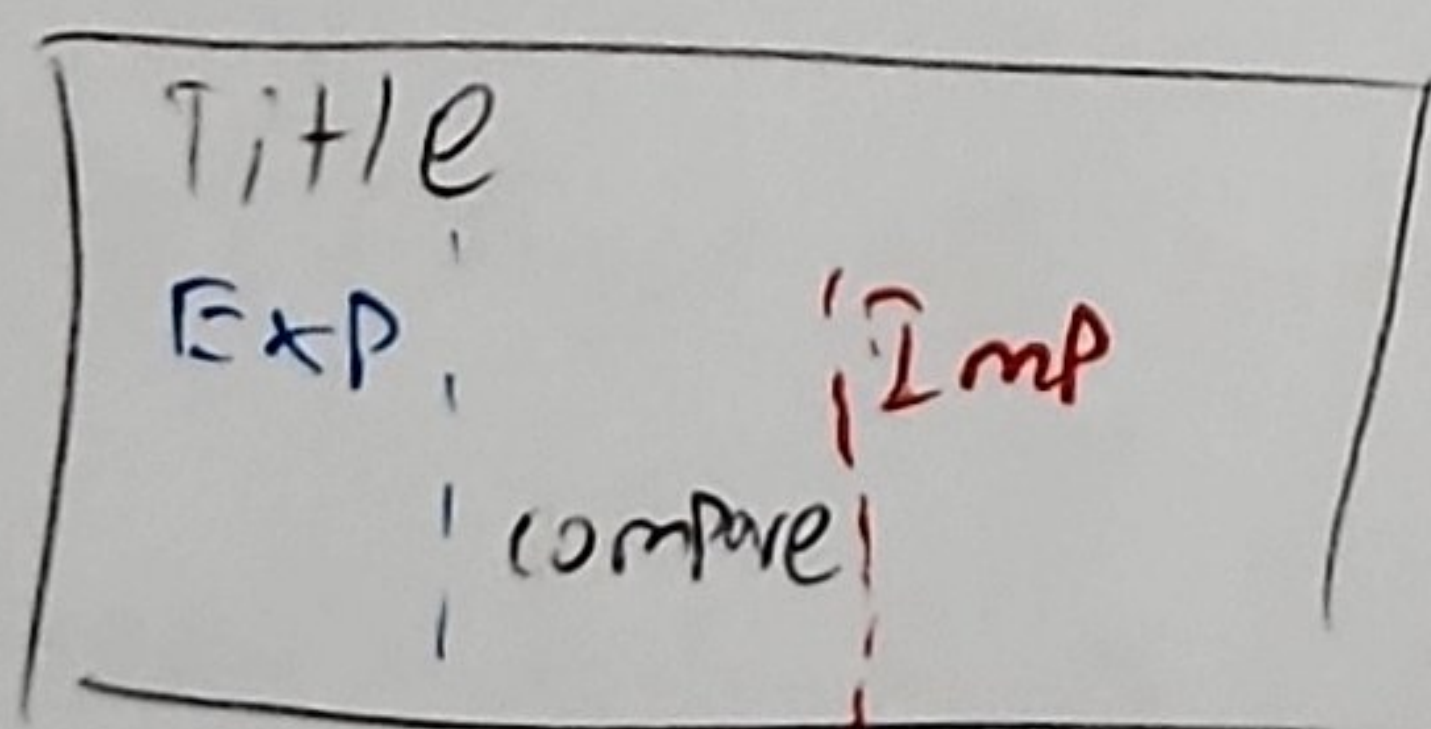

#### Imports

## Part / Focus

- no main focus on graphs
- focus applied on the rels and changes from exports vs imports

Sheet 2.1.4

Name Elizabeth Giam

Date 12/12/24

Title Aussie Trade

Description

## Components / Operations

- Potentially have bars, dropdowns and sliders to filter data

- Tooltips + legend filtering

- Symmetry between import vs export.

## Pro & Cons

### Pros

- Relx Between E vs I clearly established
- High Interactivity

### Cons

- Harder to explore other rels in Australian trade

## Big Picture / Layout

## Part / Focus

3 focuses: Map, Area chart, bubble chart.

Map: Trade exports vs Imports

Area: ~~Ex~~ Type of trade (Export Imp)

Bubble: I vs E text + size for other info.

Animations draw users attention on the text before looking at visualization

Sheet 234

Name Zembadel Giram

Date 12/10/24

Title Aussie Trade

Description

## Components / Operations

→ indicates an animation for text, sliding for title appearing for paragraphs.

• drop down filters and sliders can change the graph into an <sup>finding</sup> animation

## Pro & Cons

Pro

- Visual hierarchy is good
- variety of info can be shown
- clear structure.

Con

- layout is basic (top down)
- some info can get ignored the lower you go.

## Aussie Trade

Top Paper

## Part / Focus

Map is main focus.

→ conveys central site of info and is how user mainly interacts

→ Subgraphs for each area will all start with top exporter / importer with toggle for both

Sheet 2.3.4

Name Zennabel Gium

Date Aussie Trade 10/10/24

Title Aussie Trade

Description

## Components / Operations

Each region has its own segment in the vis.

Clicking on a region in map takes user straight to spot.

## Pro &amp; Cons

Pros

- Largely Interactive

Cons

- hard to implement
- plenty of graphs but similar idioms.

Australia Trade

Imp

Exp

Exp

## Part / Focus

3 focus: World, balance, Categories.

World: Map with I vs E

balance: balance of I vs E and other factors

Categories: Types of I and E, then the Top of both with further analysis.

## Components / Operations

- Animations for heat
- dropdowns and sliding filters for I vs E and other info.

## Details

## Dependencies

- All avail info in ideal format

## Time and Effort

- unknown due to animations, likely 5 days

## Specific requirements

- Processing power to potentially load everything
